Intelligent Access Management

A Very Smart Move in Business Security.

At Schlage, we understand that your small- to medium-sized business is a very big deal to you. That's why we believe the security and convenience of electronic access management shouldn't be reserved for larger corporate facilities. So we made it affordable, and we made it easy. Imagine it: One simple-to-use, cost-effective system that allows you to control your facility's points of entry from anywhere with internet access. We call it **bright blue**™.

Thanks to **bright blue's** smart-yet-simple design, there's no longer a need to re-key locks, change pushbutton PIN numbers or track down unauthorized keys. Just plug it in, and you're in control of who goes where and when. This blue box is very bright, indeed.

Simply Genius Access Management for Your Small Business.

Easy to Install.

bright blue is preconfigured and network ready, so there's no software to install. Plus, easy-to-use wizards walk you through set up.

Easy to Learn.

With minimal training, you'll be up to speed on **bright blue's** user-friendly software interface. After all, in a small business, time is a valuable commodity.

Easy to Use.

bright blue lets you add, delete and manage users from any computer with an internet connection.

Easy to Afford.

bright blue is priced so small businesses can afford it. And it immediately begins paying for itself because there's no need to re-key locks or purchase a dedicated PC.

Easy to Love.

bright blue means electronic access control that's as secure as it is simple.
